

# VistaPlex® SATELLITE SYSTEM (VSS®)

## A BUNDLED REMOTE VIDEO SURVEILLANCE PACKAGE

The VistaPlex® Satellite System (VSS®) is a stand-alone unit that can be installed on remote locations.

With its rugged design and high quality video recording capabilities, it opens new opportunities for video surveillance in areas that were once considered inaccessible.

Coupled with remote Internet access the VSS® creates an incredible cost cutting management tool.

### Virtual Management Tool

The VistaPlex® Satellite System (VSS®) is a “virtual employee” that helps Owners and Management oversee remote locations.

A BUNDLED REMOTE SURVEILLANCE SYSTEM

The VSS® is a “virtual employee” that helps Owners and Management oversee remote locations from the convenience of the office or on the road.

**Points of Concern**

**Remotely Manage**  
Production  
Time Management  
Billing

**Visually Inspect**  
Theft & Vandalism  
Environmental

**VistaPlex® SATELLITE**

- Perform live visual inspections daily or weekly without ever leaving your office, home or while in the field (saving valuable travel time).
- The VSS® records events that take place on location and can be stored for weeks or even months. Remotely access and playback stored video from a simple web browser. Review recent or older events with a click of a mouse.
- Remotely manage contractors and personnel on a site (track multiple management issues; productivity, safety procedures, time on location, etc.).
- First level environmental inspections can be done with the VSS®.
- VSS® Wireless Access Point – Allows designated personnel to view live or recorded video and provides Internet access to send or receive important documentation updates.
- Reduce, deter and produce evidence of Theft / Vandalism.

**VistaPlex® SATELLITE SYSTEM (VSS®)**

**“Virtual Management Tool” (VMT®)**

**Remote access to the VSS®**

• Supervisors / Service Technicians can access the VSS® to view live and recorded video. If there is an event or a report of a problem, supervisors - while at another location - can view video to determine if corrective action needs to be taken.
